REPLY TO RESTRICTION REQUIREMENT

Honorable Commissioner for Patents
U.S. Patent and Trademark Office
Customer Service Window
Randolph Building, Mail Stop Amendment
401 Dulany Street
Alexandria, VA 22314

Sir:

Applicant is in receipt of an Office Action mailed March 8, 2005, primarily in the nature of a requirement for restriction.

Acknowledgment by the PTO of the receipt of applicant's papers filed under §119 is noted.

Restriction has been required between what the PTO deems to be two (2) patentably distinct inventions. As applicant must make an election even though the requirement is traversed, applicant hereby provisionally and respectfully elects Group I directed to a cannula and assembly, and

presently comprising claims 1-24, with traverse and without prejudice.

The examiner recognizes that the present application is the U.S. national phase of an International (PCT) application, whereby normal U.S. restriction practice does not apply. Instead of restriction practice, the appropriate practice is "unity-of-invention" practice per PCT Rules 13.1 and 13.2. In this regard the PTO takes the position that there is no unity-of-invention because there is no same or corresponding technical feature under PCT Rule 13.2. However, the reasons given are not reasons which have anything to do with a single general inventive concept or the same or corresponding special technical feature, but instead the reason given by the PTO is a U.S. restriction practice reason which does not apply in the present case.

Original main claims 1 and 25 are still pending, and these are the two claims which must be evaluated for compliance with unity-of-invention under PCT Rules 13.1 and 13.2. In this regard, please note line 3 of claim 25 which defines the cannula which is used in the method of claim 25 as being the cannula of claim 1. Thus, the claims of Groups I and II share the same or corresponding special technical features, namely the features recited in claim 1.

As confirmation that applicant's position is correct as explained above, attention is respectfully invited to the

International Preliminary Examination Report (IPER), form PCT/IPEA/409 (cover sheet), section 3, part IV, which shows that during the international stage there was no finding of lack of unity-of-invention. Of course, applicant understands that the PTO is not bound by the International Preliminary Examination Report, but on the other hand such IPER is correct and should not be brushed aside, particularly in view of the principles of harmonization and comity.

Respectfully, unless and until the PTO is able to find prior art which establishes that the two Groups lack the same or corresponding special technical feature, and no such prior art is known to applicant, it must follow that there is unity-of-invention, whereby the restriction requirement should be withdrawn and all the claims examined on the merits.

Accordingly, applicant respectfully requests favorable reconsideration, withdrawal of the requirement, and examination of all the claims on the merits.

Respectfully submitted,

BROWDY AND NEIMARK, P.L.L.C.
